

[New Ham Radio Classes](#)

New Ham Radio classes beginning in March 2018.

This FREE class covers the study for a Technician level Ham Radio license, taking the license test (optional) and hands-on practice with Ham Radio gear (optional). Students will need to purchase the ARRL Ham Radio License Manual Third Edition (available on Amazon or the ARRL web site) before the class. The test session is on April 11, 2018 and is \$15. So your investment would be the License Manual (cost will vary depending where you look which is approximately \$30) and the test fee if you choose to take the exam. Morse Code is no longer required. Pre-registration is required. Contact Raleigh Ferdun, KH6EN at rferdun@gmail.com to register.
